

### **A Caribbean Spa Vacation Offers The Perfect Escape From Reality**

Going away on a Caribbean spa vacation provides people with a much-needed break from the hustle and bustle of everyday life. Spa treatments and activities for both adults and children help complete the overall experience.

A Caribbean spa vacation is all about luxury. There could be nothing better than escaping to these beautiful islands known the world over for their magnificent beaches, exotic marine life and expertise at the art of indulgence. A few days of pampering at the island paradise will, without a doubt, leave guests feeling relaxed and revitalized in body and mind.

Whether it's with the firm but gentle Swedish massage or the sensuous aromatherapy massage, stress and worries can easily be kneaded away. A classic European facial for women or a fitness facial for men rejuvenates both the skin and the spirits. The whole experience can be topped off with a manicure and pedicure to make hands, feet and nails feel and look fresh.

A Caribbean spa vacation on the island of Bonaire is ideal for that much sought-after retreat from the real world, with its intimate setting and personalized service. With world-class diving spots and warm waters throughout the whole year, vacationers can explore the island's magnificent underwater world in between spa treatments.

Vacationers who wish for alternatives in their itinerary can work out at the fitness centers, hit a few balls on the tennis courts, cruise the pristine waters on a luxurious yacht or sample the island's exquisite cuisine. Those who decide to bring their children along need not fret, as they can get pampered at the spa while their little ones are kept occupied on supervised programs for snorkeling, junior scuba diving and art classes, among others.

#### **Resource Box:**
